### Statement for APCO Aviation - NRG pro 18.5 load test

The glider APCO Aviation NRG pro 18.5 passed successfully the strength test according to EN 926-1:2006 without any structural damage.

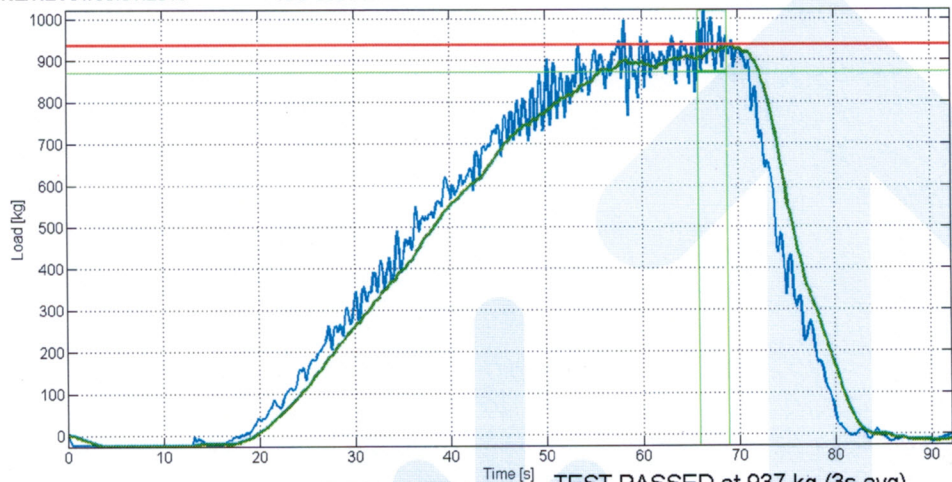

Do to the speed of this wing the load limit was restrained by the technical abilities and not the structural integrity of the wing and was not possible to pass the glider higher as 937 daN during 3 seconds over 8g.
